## Holistic Rural Development Programme (HRDP)

State: Madhya Pradesh (Gariaband)

## Partner Agency: HDFC BANK

Population Coverage: 5 slum Areas of Nagpur city

**Introduction:** Uplift and sustain the livelihood, health and education of the poorest sections of the society through financial inclusion. The project has its focus on developing school infrastructure and like school science laboratory, providing support for functioning digital class rooms, explore and promotion of income generation activities for the poorest households through sustainable means and solutions. The entrepreneurship activity based on Lac cultivation and harvesting is one of the ecologically sustainable solutions adopted by the organisation for the livelihood of the beneficiary families which is apart from a number of agriculture based income generation activities. Community participation was one of the key strategies adopted by the organisation.

## Achievements:

- 69 Self-help groups were strengthened.
- Home based entrepreneurship initiatives were started with 5 groups.
- One science laboratory has established in Sadhwani high school, for the benefit of 300 poor students of Pendra.

- In 5 schools of Gariyaband, support has extended for functioning digital classes.
- With the Lac based livelihood initiative in Pendra and Gaurella areas, 15 farmers were benefited.

9 SMART CLASS D, CG

To create a positive teaching learning envir nment for the both of teacher and students and for easiness of access the information in a dynamic manner the smart classes were established in 3 Medium Schools by the HDFC Bank "Parivartan" under Holistic Rural Development Program at Gariaband of Chhattisgarh. The smart class was inaugurated by the District Education Officer and Business team of HDFC Bank. The smart classes are helping to the teachers to sharpen the knowledge & skills through developing the students' abilities and performances by using the E-learning platform. In fact, such initiatives are creating a supportive environment for the students through constructing as an autonomous learner.
